

AMENDMENTS TO THE ABSTRACT

Please amend the Abstract of the Disclosure to reflect the following indicated below.

A method and computer program to assign certificates/private keys to a token ~~(130)~~. This method and computer program allows a user ~~(132)~~ to access a certificate authority ~~(110)~~ and have certificates/private keys that are used for signature, encryption and role purposes generated and downloaded to the token ~~(130)~~. The use of secure communication lines and computers is not necessary since the token ~~(132)~~ contains a unique token ID and private key, while the certificate authority ~~(110)~~ contains the associated public key for the token ~~(130)~~. The certificate generated is wrapped in the public key and only the token ~~(130)~~, having the associated private key, may activate the certificate.
